Static User Info Display with Conditional Rendering

App.jsx

```jsx
import UserInfo from "./UserInfo";

function App() {
  const name = "Manimegalai S";
  const isOnline = true;

  return (
    <div>
      <UserInfo name={name} isOnline={isOnline} />
    </div>
  );
}

export default App;
```

UserInfo.jsx

```jsx
import UserStatus from "./UserStatus";

function UserInfo({ name, isOnline }) {
  return (
    <div style={{marginLeft:"600px", border:"solid black
2px",width:"300px", padding:"50px", }}>
      <p>User Information</p>
      <p>Name: {name}</p>
      <UserStatus isOnline={isOnline} />
    </div>
  );
}

export default UserInfo;
```

UserStatus.jsx

```jsx
function UserStatus({ isOnline }) {
  return (
```

```
    <p>
      {isOnline ? "User is Online" : "User is Offline"}
    </p>
  );
}

export default UserStatus;
```

Output:

User Information

Name: Manimegalai S

User is Online
